Why is Our Corporate Package suitable for Your Office workplace?

Does your staff work environment involve prolonged hours in an office, manual handling or driving? Unfortunately these positions can result in increased stress and strain on your staff's bodies, resulting in decreased productivity, increased fatigue and various aches and pains.

How will the Corporate Package benefit your Employees?

We offer the ability to assess your staff and their work environment to ensure the best setup possible to decrease mechanical overuse or wear and tear on their bodies. With our centrally located Newcastle offices your staff can easily access our facilities or alternatively we can visit in house.

The connection between body positioning, movement and correctly setup work stations.

Improving body mechanics is relatively easy and a great way to improve productivity and prevent injury in the workplace. We are here to optimise body movement and function thereby decreasing stress and strain injuries and prevent overuse disorders. Using one or more of our services will certainly help you and your staff feel and perform better. A more relaxed employee is a more focussed and more productive person.

How do we book an assessment of your workplace and/or Employees?

Please call us on **4926 1101** to make an appointment for Our Team of Specialists to meet with you in regards to assessment of your workplace and/or Employees.
